

SUMMER INTERNSHIP FOR GRADUATES

The main objective of the Internship Program is to provide pipeline to SABIC by a 3 months period project experience.

Each intern will be assigned a specific project that requires applying his/her theoretical knowledge into a practical problem, this will provide the students a real work experience what it is like to work in a multinational company, and:

- Work in a multidisciplinary industrial environment.
- Opportunity to expand knowledge, technical insight and skills.
- Interact with several departments and people with different backgrounds.
- Practice of professional communication and verbal and written presentation of results: At the end of the training period, the students perform a technical presentation.

The student is expected to work independently, however a mentor will give you instructions and support to achieve your objectives. Deliverables will be according our needs and your ambitions.

Depending on the nature of the project a great variety of tasks are usually included, such as:

- Contribute to the solution of problems concerning equipment.
- Set up, extend or improve Theoretical Models.
- Model and simulate.
- Set up documentation on an existing process.
- Carry out adequate measurements.
- Participate in the daily operational meetings in the plant.

Internships will be held at Cartagena site (Region of Murcia) and the expected duration is 3 months, from July 1st, to September 30th; a longer period of time can be considered if necessary.
